DermaSaver Pressure Reduction and Protection

Layers of MicroSpring Textile put thousands of microfilaments per square inch to act as mini pressure-reducing springs. Microfilaments flex to reduce pressure on bony prominences such as the heel, elbow, vertebra and trochanter. Ample ventilation space between the microfilaments and textile layers allow for air flow and moisture transfer.

DermaSaver products are protected by the Aegis Microbe shield which uses an EPA registered antimicrobial technology to inhibit the growth of micro-organisms on the product.
